

LHD Protective Clothing and CARE Service from a single source

From modern protective clothing the wearer expects, in addition to certified protective properties, a high level of wearing comfort and ergonomics, design and functionality, Over and above this it should also be economic and sustainable, i.e., guaranteeing high quality and positive care properties.

Wesseling, August 2021

Today's LHD Group Deutschland GmbH has been providing professional occupational and protective clothing for demanding jobs for almost 20 years. With headquarters in Wesseling 160 employees worldwide regularly develop modern products with innovative functions and high quality.

LHD CARE – The complete service for your protective equipment

With individually combinable service modules – from washing, inspection, and repair through to a rental service for protective suits from an emergency pool – the LHD CARE System guarantees the best possible service for your protective clothing, extending beyond the mere production.

In this respect, the LHD offers an advantage for fire services and enterprises by avoiding the risks or errors in their washing or repairing articles themselves, risks or errors which could influence the safety of the wearer. By means of professional washing and drying – suspended in special drying cabinets – as well as spray impregnation, which, in particular, does not affect the functionality of the membrane it is thus ensured that the product life cycle is lengthened. In the case of damages which are determined in the visual check, the clothing is repaired immediately on site. This ensures constant control and repair of any damage.

The emergency pool which has already been in operation for a number of customers has proved its worth. The possibility of being able to obtain protective clothing at any time ensures constant operational readiness even when the customer's own clothing is contaminated or damaged. The LHD has now decided to extend the emergency pool to provide customers this rental service independent of washing. The clothing can be returned after wearing and subsequently treated to professional treatment and then stored again in the emergency pool.

Company Profile

For almost more than 20 years the current LHD Group Deutschland GmbH has provided holistic solutions for your professional and protective clothing. In so doing, functionality, quality and a high level of wearing comfort are of uppermost priority whether it is the case of a uniform and action clothing, protective equipment, workwear or corporate fashion.

Care. The LHD provides more than simply the manufacture of the clothing. Individually combined service modules, from laundry through to repair and an emergency pool in the 'LHD CARE' system are now providing total service for your clothing.

Protection. Whether in the case of operations in the field or in daily working surroundings – safety is of primary importance! Your safety is insured by personal protective equipment from head to toe as well as by product and service concepts catering for your individual requirements.

Fashion. Innumerable innovations together with our know-how are evident in the development of our products. Every single job creates different requirements for the appropriate clothing. Our individual solutions are as varied as the operational fields of Corporate Fashion themselves.
